

# SPRINT 1

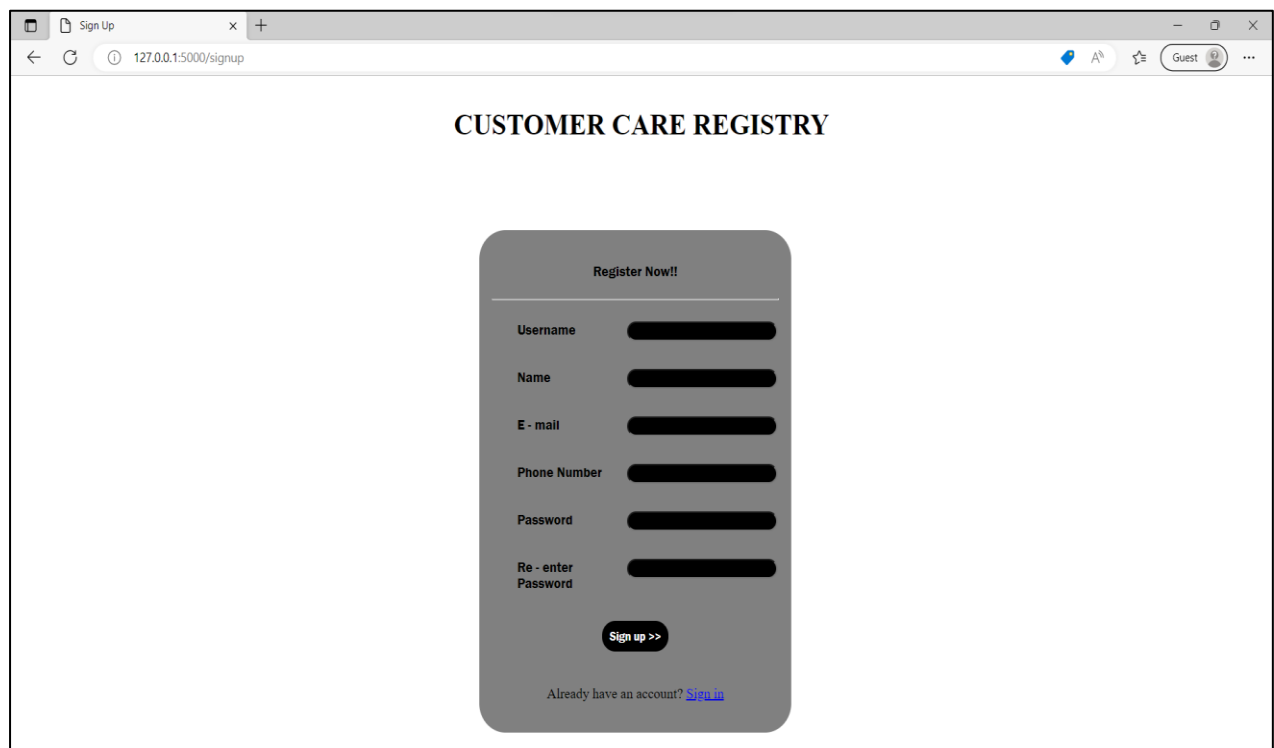

Team ID : PNT2022TMID07931

Teammates:

1. BARATH KUMAR S (TL)
2. BALAJI S
3. ARUN KUMAR S
4. DEEPAK K

Sprint 1:

1. Create a UI to interact with the Application.

The screenshot shows a web browser window with a single tab titled 'Sign Up'. The address bar displays '127.0.0.1:5000/signup'. The page content features the heading 'CUSTOMER CARE REGISTRY' in bold, uppercase letters. Below the heading is a dark gray, rounded rectangular form titled 'Register Now!!'. The form contains six input fields with labels: 'Username', 'Name', 'E - mail', 'Phone Number', 'Password', and 'Re - enter Password'. Each field is represented by a solid black bar. At the bottom of the form is a black button with the text 'Sign up >>'. Below the button, there is a link that says 'Already have an account? [Sign in](#)'.

**CODE:****App.py**

```
from flask import Flask, render_template, request, redirect, session, url_for
import ibm_db
import re

app = Flask(__name__)

@app.route('/dashboard')
def dashboard():
    return render_template('dashboard.html')

@app.route('/')
def base():
    return redirect(url_for('login'))

@app.route('/login', methods=["GET", "POST"])
def login():
    global userid
    msg = ""

    if request.method == 'POST':
        username = request.form['username']
        userid = username
        password = request.form['pass']
        if userid == 'admin' and password == 'admin':
            print("its admin")
            return render_template('admin.html')
```

## login.html

```
{% extends 'base.html' %}

{% block head %}

<title>

    Login

</title>

{% endblock %}

{% block body %}

<h1 style="text-align: center;">CUSTOMER CARE REGISTRY</h1>

<div class="forpadding">

    <!-- for box of the signup form -->

    <div class="sign">

        <div>

            <p class="fortitle">

                Sign In

            </p>

            <hr>

            <form action ="/login" method="post">

                <div class="forform">

                    <div class="textinformleft">

                        Username

                    </div>

                    <div class="textinformright">

                        <input type="name" name="username">

                    </div>

                </div>

                <div class="forform">

                    <div class="textinformleft">

                        Password
```

</div>

<div class="textinformright">

<input type="password" name="pass">

</div>

</div>

<br>

<div>

<button class="forbutton" type="submit"> Sign In >></button>

</div>

</form>

<br>

<div>

New user? <a href="/signup">Sign up</a>

</div>

<br>

</div>

</div>

</div>

{% endblock %}

## Base.html

```
<!DOCTYPE html>

<head>

  <link rel="stylesheet" href="static/css/main.css"/>

  {% block head %}

  {% endblock %}

</head>

<body>

  {% block body %}

  {% endblock %}

  <script>

    var coll = document.getElementsByClassName("collapsible");

    var i;

    for (i = 0; i < coll.length; i++) {

      coll[i].addEventListener("click", function () {

        this.classList.toggle("active");

        var content = this.nextElementSibling;

        if (content.style.display === "block") {

          content.style.display = "none";

        } else {

          content.style.display = "block";

        }

      });

    }

  </script>

</body>

</html>
```
